

‘EVA’, our Enhanced Video Annotation service, gives all Mediaview users a set of annotation tools that make it easy to turn any video into an interactive video.

EVA offers 14 different types of interactions which pop up on the screen while the audience watches a video.

- Enrich any video with added information.
- Engage viewers with questions, quizzes and puzzles.
- Gain immediate responses for training.
- Conduct surveys.
- Unlimited viewer access.

EVA Lite - Add in-depth information with 5 no-response tools - Labels, Text, Tables, Links and Images that the viewer can see on the screen during video playback.

EVA Pro - Create quizzes, tests, puzzles and polls from 9 interactive tools for viewers to answer at any time in the video.

Add Multiple Choice, Single Choice, Fill-in the Blanks, Drag and Drop Words, Text Entry and Drag Text activities to a video.

The responses are available to the creator of the EVA along with data and analytics for further analysis and assessment. Receive interaction data by named or unidentified individuals.
